## PILOTHOUSE

QUINCY

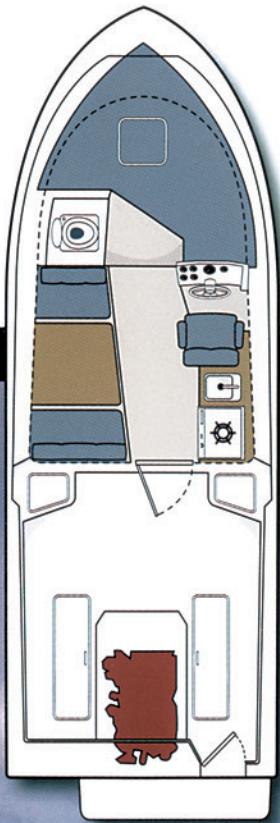

A Pacific Northwest original, Osprey Boats can be found across North America and Europe. Built by America's most experienced fiberglass boat builder, the New Osprey Pilothouse line-up is perfectly suited for both offshore sport fishing and inland pleasure cruising. The focus at Osprey Pilothouse is to produce the strongest boat that achieves the optimum standards for quality and dependability. Every model is designed and constructed to deliver the highest level of performance and customer satisfaction.

We are proud to offer boats that are famous for their fishing capabilities, which are considered by many to be second to none. Just as important, though, are the creature comforts that make an Osprey Pilothouse the perfect match for families whose ideal time is spent cruising our country's gorgeous waterways.

For the avid sports fisherman, we offer the 24 and 26 Fisherman. These "no nonsense" models are the backbone of Osprey Pilothouse line-up and lay the foundation for who we are. Next up are the 26 and 28 Long Cabin models, which both offer a full galley, stand-up head, and the ability to comfortably sleep 4 for extended periods of time. Filling out the fleet is the 30 Long Cabin that offers a twin-engine power package as well as larger layout in the galley, dinette, and head. With the ability to sleep up to 6 people, the 30 Long Cabin makes those extended stays in remote inland lakes or secluded coastal coves a pleasure.

Whether fishing or cruising, we are confident that one of our versatile Osprey Pilothouse models will be an excellent addition to your boating activities. We are committed to building your family the boat that will exceed your expectations, and that will provide memories that will last you a lifetime. Everyone deserves the finest multi-purpose vessel built in today's market and your Osprey Pilothouse is waiting for you now.
